

Carbon Reduction Plan

Supplier Name: **Normanby Laboratory Services Limited**

Publication Date:

Commitment to achieving Net Zero.

Normanby Laboratory Services Limited is committed to achieving Net Zero emissions by **2050**

Baseline Emission Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 (01/02/2023 - 31/01/2024)

Additional Details relating to the Baseline Emissions calculations

NA

Baseline Year Emission

Emissions	Category	Total (tCO ₂ e)
Scope 1	-	NA
Scope 2	-	1.22
Scope 3 (Included Sources)	Upstream Transportation and Distribution	1.53
	Business Travel	9.11
	Employee Commuting	1.76
	Downstream Transportation and Distribution	2.32
	Waste generated in operations	0.25
	Scope 3 Subtotal	14.97
Total Emissions		16.19

Scope 1 Category - Direct emissions from owned/controlled operations No gas in the facility

Current Emissions Reporting

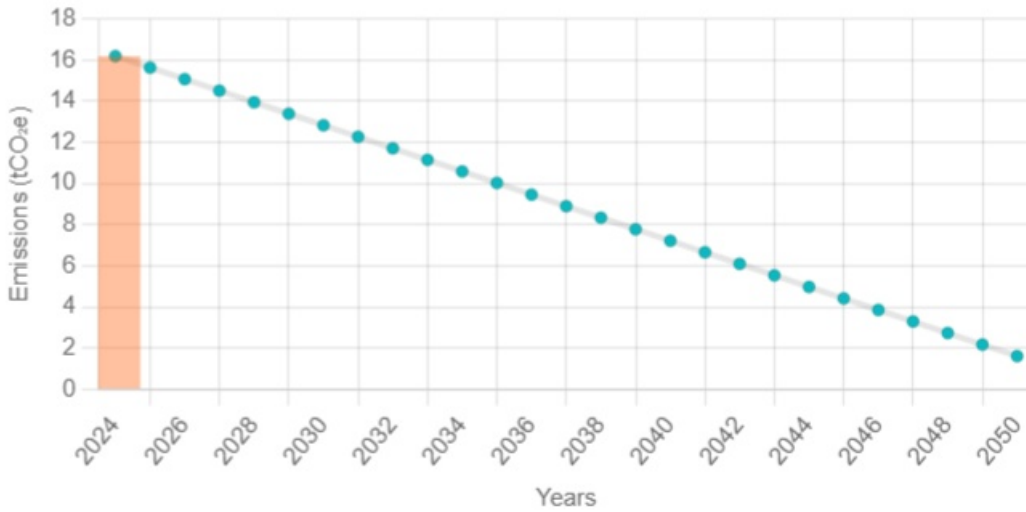

As this is the first reporting year, no further emissions can be reported at this time.

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease to 12.52 tCO₂e by 2030. This is a reduction of 25.20%.

Progress against our Net Zero target can be seen in the graph below:

Carbon Reduction: Projected Vs. Actual

Carbon Reduction Projects

In the future we hope to implement further measures such as:

reduce the use of plaster and water using the introduction of 3d printers and have all production through those, use of less vehicles

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
